| Would love to have some options be per-channel similar to how mIRC does it. Such as: different font for a specific channel; selecting to show/hide Events for a specific channel like the join/part/quit/kick etc |              |                        |            |
