<b>Description</b>			
Currently we can only set treebar to the right of the nicklist. This can leave a lot of empty space available, specially if you don't have a long list of channels. I'm hoping to do something like shown in this image: <a href="http://s29.postimg.org/k609pr8ev/image.png">http://s29.postimg.org/k609pr8ev/image.png</a>

- Status changed from New to Assigned
- Assignee set to Per Amundsen
- Target version set to 1.9.9

The nicklist is integrated into the window, there will not be a Treebar inside each window, however I have on TODO to create a dockable nicklist which changes base on current active window.
