AdilRC - Bug #3094

whois signed on length.

12/04/2016 11:05 PM - james parrish

Status:	Closed		**Start date:**	12/04/2016
Priority:	Normal		**Due date:**	
Assignee:	Per Amundsen		**% Done:**	0%
Category:	Irc		**Estimated time:**	0.00 hour
Target version:	2.7			
Operative System:	All		**Regression:**	No

Description
i noticed perhaps due to the length of connection time that the proper total signed on time in whois isn't reporting correctly.. for example, this is what AdilRC is reporting; [04-Dec-16 16:59:25] * jcp has been idle 9mins 58secs, signed on 3wks 1day 1hr 8mins 7secs ago. and this is what irssi is telling me; 17:13 -!- idle   : 0 days 0 hours 10 mins 25 secs [signon: Sun Aug 14 15:51:18 2016]. obvious obviously august the 14th was a lot more than 3 weeks and a day ago lol..

Can you open File -> Rawlog, do the whois, then go to the rawlog, select the correct server in the listbox, find the raw whois line and copy/paste it here?

<- :serenity.ix.us.dal.net 275 jcp jcp :is using a secure connection (SSL)
<- :serenity.ix.us.dal.net 317 jcp jcp 1309 1471204278 :seconds idle, signon time
<- :serenity.ix.us.dal.net 318 jcp jcp :End of /WHOIS list.
