

AdiIRC - Bug #3240

\$file not working

01/29/2017 07:42 PM - westor (GR)

Status:	Closed	Start date:	01/29/2017
Priority:	Normal	Due date:	
Assignee:	Per Amundsen	% Done:	0%
Category:	Scripting	Estimated time:	0.00 hour
Target version:	2.7	Regression:	No
Operative System:	All		
Description			
Hello,			
If i change the "AdiIRC.exe" file name into something other like "AdiIRC_32.exe" the \$file identifier doesn't seems to work.			
//echo -ag \$file(\$adiircexe) not working.			
- Thanks!			

History

#1 - 01/29/2017 07:52 PM - Per Amundsen

- Status changed from New to Resolved

- Operative System changed from Windows 10 to All

Using a filename other than AdiiRC.exe is not supported, e.g all updates will be written to AdiiRC.exe, but I made it return the executed filename for next beta.

#2 - 01/29/2017 07:52 PM - Per Amundsen

- Status changed from Resolved to Closed

#3 - 01/30/2017 12:25 AM - westor (GR)

That sounds more clear, thanks!
