Description

Hello,

When i use **/dialog -md testing testing** in order to open this dialog it didn't open and it also didn't receive any error message, the currently error is because i set 'tab 1' that i didn't create tabs inside the dialog setup, but in this case it should return an error because the dialog did never opened.

Test code:

```
dialog testing {  
  title "test"  
  size -1 -1 233 108  
  option dbu disable  
  list 3, 4 30 99 47, tab 1 size vsbar disable  
}
```

History

#1 - 02/04/2017 08:04 PM - Per Amundsen

- Status changed from *New* to *Resolved*

There used to be a error, but the error display broke in some places last beta due to rewrites, I have fixed that for next beta.

And using tab N without a tabcontrol is also allowed now.
