Description

Hello,

I wanna request a feature that is really gonna place the AdiIRC features at the top because it's one of the most wanted in the market, especially if this can work without any external DLL's (like dcx.dll), it would be nice to add support to implent icons support into the right click context menu of the AdiIRC menus, i will provide an example to see.

Example Code:

```
menu status {  
  $menuico($adiircdiricons\ $+ info.ico) test menu:echo -a testing1  
}
```

Image Example: Ir0aRr

- Thanks!

- Status changed from New to Resolved

I highly doubt this is "most wanted in the marked", but I added \$menuicon(filename) for fun in next beta.
