Operative System:	All		
Description			
Hello,			
Actually after a lot spending time i reproduce why sometimes the scripts editor checking brackets returned an error, it's because while i was coding i was pressed Shift+Enter which is adding an unwanted ascii character, i don't know if this is an feature but if it is it would be nice to see an option about enable/disable it because it's getting annoying adding an extra CRLF or CR or LF when pressing Shift+Enter.			
- Thanks!			

History

#1 - 08/26/2017 01:44 PM - Per Amundsen

Shift+Enter does not add any extra characters here, only a newline as expected.

#2 - 08/26/2017 04:08 PM - westor (GR)

Check that video to reproduce it: <https://goo.gl/ymioDi>

#3 - 08/26/2017 04:21 PM - Per Amundsen

- Status changed from New to Resolved

I cannot reproduce, but I took control over the shortcut and added the newline myself, should fix it.
