AdiIRC - Bug #3702

Monitor buffer logging is not always saved/restored correctly

08/29/2017 11:54 PM - Mr. BS

Status:	Closed		**Start date:**	08/29/2017
Priority:	Normal		**Due date:**

Category:	Interface		**Estimated time:**	0.00 hour
Target version:	3.0			
Operative System:	All		**Regression:**	No

Description

Bellow is my current Monitor Panels config:

```
[Monitor]
EnableMonitor=True¦True¦True¦True¦True¦True
MonitorBuffer=200¦200¦200¦200¦200¦200
MonitorExclude=*nickserv,*sasl,*status,#GRfanfic,#sdasdas,#blabla,#beast-xdcc,
MonitorInclude=
MonitorServerNickcolumn=False
MonitorServerTimestamp=True
MonitorServerNetwork=True
MonitorChannelNickcolumn=False
MonitorChannelTimestamp=True
MonitorChannelNetwork=True
MonitorIgnoreDuplicates=True
MonitorExcludeActive=True
MonitorShowMessages=0
MonitorShowEvents=0¦0¦0¦0¦0¦0¦0¦0
MonitorSave=True¦False¦True¦True
```

For some unknown reason, AdiIRC was able to save a huge 116 MB Private buffer on my end full of repeated garbage messages. Due this big log file, the client crash or stay in some loop on startup I guess, maybe waiting a long time it could be able to load it, I'm not in mood to wait that long :P

If you want to give it a try, log file is attached. Extract it to Cache\Monitor folder and use my config above.

I thought setting buffer to 200, the log file would have only 200 entries.

Tested on latest fresh beta build, as always.

History

#1 - 08/30/2017 11:22 PM - Per Amundsen

What are the steps to reproduce making it save more than MAX lines?

#2 - 08/31/2017 12:44 AM - Per Amundsen

- Subject changed from Private Monitor buffer logging limit fail to Monitor buffer logging is not always saved/restored correctly

- Status changed from New to Resolved

I think I found the issue, but in case I didn't, I made it restore only MAX buffer on startup.

#3 - 08/31/2017 12:44 AM - Per Amundsen

- Status changed from Resolved to Closed

#4 - 08/31/2017 02:54 AM - Mr. BS

Good, at least it should load fine.

No clue how my client generated the big file, I just was away from irc for weeks, so updated to 3.0 beta yesterday and it was unable to startup properly.
