Target version:	3.2		
Operative System:	All		
Description			
Hello,			
As i saw the supporting method that Nicklist Icons working are TEXT,ACTION but missing the channel NOTICE, it would be nice to see supporting that method too.			
Example:			
YctUJaf.png			
- Thanks!

It's currently not possible because there is no prefix option for notice messages like \$pnick which is where the icon is added, there are many notice types and each type a custom prefix depending on the context.

It might change in the future.
