Description

Hello,

It would be nice in the **\$osversion** reply to return the Windows version number and the build number too on it.

Now: Windows 10 Professional (Version 10.0 Build 17134)

It would be nice to see: Windows 10 Professional (Version 10.0 1803 Build 17134.191)

As the 'winver' reply:

s58aeV9.png

- Thanks!
