Operative System:	All		
Description			
Hello,			
There is a bug, when i try to filter the following data AdiIRC messing them out.			
Code:			
<pre>alias test_filter { var %win = @Test var %f = test.db window -j \$+ \$lines(%f) %win loadbuf %win \$qt(%f) filter -ceutw 2 32 %win %win }</pre>			
Data:			
<pre>test_one 10 test_two 20 test_three 30</pre>			
- Thanks!			

History

#1 - 08/13/2018 06:30 PM - Per Amundsen

- Status changed from New to Resolved

This is not really related to /filter, it's because the text view returns newline separated lines which becomes 4 lines instead of 3.

#2 - 08/13/2018 06:30 PM - Per Amundsen

- Status changed from Resolved to Closed

#3 - 08/13/2018 06:36 PM - Per Amundsen

I did change the status to resolved by removing the extra empty line from the text view in all scripting cases.

#4 - 08/13/2018 07:10 PM - Per Amundsen

- Subject changed from /filter -w doesn't filtering correctly the results to Text view adds a empty line which interferes with some identifiers
