

AdiIRC - Bug #4138

/halt in the \$findfile() \$finddir() command should be ignored

10/07/2018 01:20 AM - Kha Led

Status:	Closed	Start date:	10/07/2018
Priority:	Normal	Due date:	
Assignee:	Per Amundsen	% Done:	0%
Category:	Scripting	Estimated time:	0.00 hour
Target version:	3.2	Regression:	No
Operative System:	All		
Description			
//noop \$findfile(.,*,1,halt) echo -a ok			
The above executes correctly in mIRC, halt onlt halts the \$findfile search. Strangely enough, \$hfind does not have this problem			

History

#1 - 10/12/2018 03:36 AM - Per Amundsen

- Subject changed from *adiirc is halting when it shouldn't* to */halt in the \$findfile() \$finddir() command should be ignored*
- Category set to *Scripting*
- Status changed from *New* to *Resolved*
- Assignee set to *Per Amundsen*
- Operative System changed from *Windows 7* to *All*

All identifiers in mIRC have their own quirks and inconsistencies, sometimes when I discover a behavior such as in this case where errors in the command inside \$findfile() and \$finddir() halts the script, regular halt behavior was copied as well.

I fixed if for the next beta, thanks.

#2 - 10/12/2018 03:36 AM - Per Amundsen

- Status changed from *Resolved* to *Closed*
