

AdiIRC - Bug #4140

/download -o should not try replace file if the connection is failed

10/09/2018 10:07 PM - Cassio Luz S.

Status:	Invalid	Start date:	10/09/2018
Priority:	Normal	Due date:	
Assignee:	Per Amundsen	% Done:	0%
Category:	Scripting	Estimated time:	0.00 hour
Target version:	3.3	Regression:	No
Operative System:	All		

Description

Example:

```
//download -o gungirl https://therooster.com/sites/default/files/userfiles/images/gungirl17.png $adiircdirgungirl.png
```

If your internet is online and running well, fine

If not, it tries to replace the image and "damages" it.

History

#1 - 10/09/2018 10:33 PM - Per Amundsen

The file is deleted before any connection is made, this is the correct behavior.

If the new file is partially downloaded because of network errors, AdiIRC will try delete the new file as well.

#2 - 10/13/2018 05:00 PM - Per Amundsen

- Category set to Scripting

- Status changed from New to Invalid

- Assignee set to Per Amundsen
