#### Description

Hello,

There is a bug, when i use **/filter -og** and for outfile path i use **\$qt(PATH)** to specify the long version path of the file it returns an error and is not working.

#### Example Code:

```
dialog -l test_2 {
  title "TEST"
  size -1 -1 127 55
  option dbu
  list 1, 2 3 123 50, size vsbar multsel extsel
}
```

```
ON *:DIALOG:test_2:init:*: { filter -og $qt($adiircdirtest.ini) $dname 1 ^\[[^\]]+\}$ }
```

```
alias test_2 { dialog -md test_2 test_2 }
```

- Thanks!

#### History

##### #1 - 10/17/2018 08:30 PM - westor (GR)

Typo in title: /filter -og returns an error on long paths via \$qt()

##### #2 - 10/19/2018 12:20 AM - Per Amundsen

- Subject changed from /filer -og returns an error on long paths to /filer [infile] parameter doesn't work with quotes

- Status changed from New to Resolved

I assume you meant \$adiircdirtest.ini and not \$adiircdirtest.ini.

There is no problem with the path/filename, but the quotes are not removed.

##### #3 - 10/19/2018 12:20 AM - Per Amundsen

- Status changed from Resolved to Closed
