

AdiIRC - Bug #4242

Updater is modifying shortcuts

11/20/2018 02:11 AM - Cassio Luz S.

Status:	New	Start date:	11/20/2018
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	3.3	Regression:	No
Operative System:	Windows 10		
Description			
Take a look: https://drive.google.com/open?id=1Xl7aaw565trwjor7Z76ptIH6XshjYB3c			
It happened after i used the updater to install the new beta version.			
Those "Ã" has been added automatically.			

History

#1 - 11/20/2018 02:16 AM - Per Amundsen

That looks very very bad, can you email me your config.ini untouched to amundsen@gmail.com? It needs to be untouched so I can check encoding.

If you are worried about in transit privacy, maybe zip it with a password.

I made the fix before you posted your message

I guess it will not help anymore

#3 - 11/20/2018 02:20 AM - Per Amundsen

If you open config.ini in notepad, do you see anymore of these "Ã" ?

#4 - 11/20/2018 02:21 AM - Per Amundsen

Also what was the original command?

#5 - 11/20/2018 02:29 AM - Cassio Luz S.

I use shortcuts regularly on adiirc, so i needed to fix them to use the shortcuts normally again. Sorry.

Yes, i see. Now in [Notify] and some other parts as well.

Per Amundsen wrote:

The shortcuts?

If you open the screenshot, you just need to imagine them without those "Ã"

The F7 for example is: `_psys.open -md options` (yes, a custom alias developed for my project)

The alias is very simple: https://drive.google.com/open?id=1wUirWkF7Gt4NqnLViM2EI06rVWqPj5BiseM_gSxjo7Q

It seems all the "|" separators is broken for you because of a bad encoding somewhere, all options using them are probably broken.

If you have a backup of your config.ini somewhere, it would be interesting to see if copying it to your adiirc folder does the same thing again when AdilRC is started.

#7 - 11/20/2018 02:50 AM - Per Amundsen

I am sure it's [#4215](#) causing this issue, although it shouldn't happen, I will revert it just in case.

Some of those separators appears normally for me

I don't have backup

#9 - 11/20/2018 02:53 AM - Per Amundsen

might be new ones created after saving in options, hard to tell now.

#10 - 11/20/2018 03:03 AM - Cassio Luz S.

Well, no problem.

Relax ;) i don't consider my config.ini so important for me.

My networks.ini looks perfect so far, as well my addrbk.ini...and the **shortcuts** i add again later without problem.

I deleted my config.ini and re-opened adiirc...i will let you know if i discover something new. Anyway, i hope you release a new beta with a certain priority.

#11 - 11/20/2018 03:25 AM - Per Amundsen

I made a new beta, hopefully it wont happen again, if it does please let me know.
