Target version:	3.8	Regression:	No
Operative System:	All		
Description			
Hi			
[23:59:39] ire.site.com [Spamfilter] Diabloo!o-xxx@xxxx matches filter 'http': [PRIVMSG #chan: 'https://site.com/i/img_5e4b1ad9eefcd.gif'] [Spam/Publicité]			
By that it happens that administrator click on the url from the notice of the spamfilter. But no luck the character ' is at the end of the url which gives: https://site.com/i/img_5e4b1ad9eefcd.gif			
can you remove it?			

History

#1 - 02/18/2020 06:17 AM - Per Amundsen

The url does not end with ' though it ends with ', if it ended with just ' it would work.

mircc seems to checks if the url begins with a ', then finds the last ', it then checks a list of "allow these characters to be trimmed at end" for each following character, if one character is not on the list, the ' is included.

The list is not transparent, but it does include] which is why this works in mircc.

I'll try figure out the list at some point and whether if I want to follow it.

#2 - 06/06/2020 06:51 AM - armin armin

On version 3.9 beta, this bug still exists. Just delete the 'at the end of the url as a "trim ()" will do
