

AdiIRC - Bug #4983

Echoing link with colour and \$+ identifier doesn't underline hyperlink or trigger inline images anymore

02/24/2020 09:26 PM - Jonathan Kay

Status:	Closed	Start date:	02/24/2020
Priority:	Normal	Due date:	
Assignee:	Per Amundsen	% Done:	0%
Category:	Scripting	Estimated time:	0.00 hour
Target version:	3.8	Regression:	Yes
Operative System:	All		
Description			
<p>This is from a script of mine that broke in 3.8 2020/02/23. If you do:</p> <pre>//echo -ag test \$chr(3) \$+ 4 \$+ http://adiirc.com</pre> <p>In prior versions (including 3.8 2020/02/18), the output is an underlined hyperlink, like: test http://adiirc.com In 2020/02/23, the link is not underlined, it does not trigger inline images if it's an image, but is still clickable as a hyperlink and the hand appears on hover. jHc8ChW.png</p> <p>Adding a single char (ex. ~) in front of the link will make it work: fytF2wi.png</p> <p>You can also workaround the issue and restore how it worked before by moving the final \$+ to immediately after the "test"</p> <pre>//echo -ag test \$+ \$chr(3) \$+ 4 http://adiirc.com</pre> <p>r3jzkbc.png</p>

- Status changed from New to Resolved

The new link validator doesn't consider links who included control codes valid links (they are touching the link) so it's treated as just regular text, I fixed it for next beta, thanks.
