Deleted networks.ini and started all over with a new one and now it seems to be working as before, sorry for the confusion, there must've been something that I didn't configure properly before.

#2 - 03/03/2020 11:08 PM - Per Amundsen

- *Category set to Interface*
- *Status changed from New to Invalid*
- *Assignee set to Per Amundsen*

Let me know if it happens again and you can reproduce, you can email a broken networklist to amundsen@gmail.com.

Closing it for now.
