

AdiIRC - Bug #5195

Highlights tab doesn't show all the highlights from the ZNC buffer.

11/24/2020 06:48 AM - eahm eahm

Status:	Invalid	Start date:	11/23/2020
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	4.0	Regression:	No
Operative System:	All		
Description			
When I load HexChat or mIRC for example with a script I can see hundreds of them, AdiIRC shows less than 10. I am pretty sure it always worked well. Testing the latest beta 64bit.

I am not able to reproduce nor heard anybody with this issue.

Some things to try:

Disable all scripts.

Check all the rules and options in Options -> Highlights are correct.

Check File -> Rawlog for the incoming raw messages and whether they contain text matching the highlight rules.

If there are any raw message not matching a highlight rule, please provide the raw message and the specific highlight rule.

Also keep in mind that by default, all duplicate monitor panel items/messages are ignored, there is an option to disable that.

#2 - 11/24/2020 07:39 AM - Per Amundsen

Also check Options -> Ignore and Options -> Highlights for rules where highlights are ignored for specific channel/users.

I feel damn stupid now but only 90%, the 3-4 times I tried previously the scroll couldn't/wouldn't go up, now it can and all the highlights are there hidden on top.

All the settings are fine, 0 scripts. Thanks again man.
