AdiIRC - Bug #5331

$target returns wrong value in some events

06/01/2021 04:13 AM - eahm eahm

Description
Is there a way to make this work on AdiIRC? https://forums.mirc.com/ubbthreads.php/topics/252752/ZNC_Query_Buffer_Self-Message_   Thank you.

History

Don't see a reason why it shouldn't work, doesn't seem to do anything special.

#2 - 06/01/2021 04:32 AM - eahm eahm

I'll try again but it looked like it didn't open the query window, it printed all the msgs in an open chan window (without actually sending the msgs).

edit:
Same, it prints the whole query in the open chan window.

kr0n, the issue with this is the ON OPEN event...

```
if you're using ON ^*:OPEN:?:{ echo -a $target } -- it returns the current window name you have open (which is
 wrong.)
if you're using ON *:OPEN:?:{ echo -a $target } -- if returns the nickname of the person who is sending you th
e msg. (which is also wrong)
```

the correct value here should be $me

```
using ON ^*:OPEN:?:{ echo -a $target } -- should return $me
```

#4 - 07/01/2021 12:15 PM - Per Amundsen

- Tracker changed from Feature to Bug

- Subject changed from znc self-message mIRC script not working on AdiIRC to $target returns wrong value in some events

- Category set to Scripting

- Status changed from New to Resolved

- Assignee set to Per Amundsen

- Regression set to No

The correct value should actually be the target in "PRIVMSG <target> :text" which could be $me but also other nicks, I fixed that for next beta.
