Description

Not sure it's just me but they were 20x more intuitive, these new ones take extra clicks and not with the mouse in the same place etc. they are just annoying.

Maybe I'll get used to them I don't know, anyone else?

History

I understand. Button at the bottom same as any other button in adiirc makes more sense, users are also not able to understand how the 2 button worked regardless of what the text on them said and would always click "connect" and complain that it didn't do what they wanted.

There will be an option to set the preferred method and hide the popup when clicking the connect button, shift + click could then show the popup if necessary.

Thanks man.

#3 - 08/25/2021 05:14 AM - Per Amundsen

- Subject changed from *Please bring back the old style Connect buttons.* to *Add ability to hide the new connect popup dialog with a preferred default*
- Category set to *Interface*
- Status changed from *New* to *Resolved*
- Assignee set to *Per Amundsen*

I added a "Don't show this box again" checkbox to the dialog which saves the current selected option as the preference, shift clicking the button opens the popup temporary.
