

AdiIRC - \$asc - # 4

Added in 1.9.0

\$asc(C)

Returns the [ASCII](#) value of the character C.

Also see [\\$chr](#) for the reversed version.

Parameters

C - The character.

Example

```
; Returns 65.  
//echo -ag $asc(A)
```

```
; returns 42  
//echo -ag $asc(*)
```
