

AdiIRC - \$asctime - # 21

Added in 1.9.0

\$asctime

Returns current date and time. (Day Month Date XX:XX:XX Year format)

\$asctime(N,format)

Returns the time and date in text format associated with the [\\$ctime](#) time value.

Parameters

N - A unix timestamp. ([\\$ctime](#))

format - Date format to return.

Example

```
; Returns the default text format for this time value.
```

```
//echo -ag $asctime(793947600)
```

```
; Returns the current time in hh:nn:ss format.
```

```
//echo -ag $asctime(hh:nn:ss)
```

```
; Returns the date for this time value.
```

```
//echo -ag $asctime(793947600, dd/mm/yy)
```
