

AdiIRC - \$cb - # 5

Added in 1.9.0

\$cb

Returns the clipboard contents.

\$cb(N,[u,%var|&binvar])

Returns a line of text from the clipboard.

Parameters

N - If N = 0 returns total number of lines in the clipboard, if N = -1 returns all the text in the clipboard, otherwise return the Nth line in the clipboard.

u - Returns UTF-8 encoded text. (Optional)

%var|&binvar - Results are stored in them and the identifier returns the length of the text. (Optional)

Properties

.len - If N = 0 or -1 returns total length of all lines in the clipboard otherwise return length of the Nth line.

Example

```
;Return number of lines in the clipboard
//echo -ag $cb(0)
```

```
;Return 5th line in the clipboard
//echo -ag $cb(5)
```

```
;Return length of the 5th line in the clipboard
//echo -ag $cb(5).len
```
