

## AdiIRC - \$chr - # 3

*Added in 1.8.10*

### **\$chr(N)**

Returns the character with [ASCII](#) value N.

*Also see [\\$asc](#) for the reversed version.*

### **Parameters**

N - the [ASCII](#) value.

### **Example**

```
;Returns ASCII character A  
//echo -ag $chr(65)
```

```
;Returns ASCII character *  
//echo -ag $chr(42)
```
