

AdiIRC - \$count - # 3

Added in 1.8.10

\$count(string,substring,substring2,...,substringN)

Returns the number of times substring occurs in string.

[\\$count](#) is case-insensitive, see [\\$countcs](#) for case-sensitive version.

Parameters

string - The string to search for.

substring,substring2,...,substringN - Substrings to search.

Example

```
; Count number of times 'el' appears in 'hello'.  
//echo -ag $count(hello,el)
```

```
; Count number of times 'l' appears in 'hello'.  
//echo -ag $count(hello,l)
```
