

AdIRC - \$dccignore - # 4

Added in 2.7

\$dccignore

Returns [\\$true](#) if [Options](#) -> [Dcc](#) -> [Dcc Ignore Method](#) is set to accept only/ignore only, otherwise [\\$false](#).

See also [/dcc](#).

\$dccignore(N/filename)

Returns the Nth item in the Dcc ignore or accept list in [Options](#) -> [Dcc](#) -> Dcc Ignore.

Parameters

N - If N = 0 returns number of items in the Dcc ignore/accept list, otherwise the Nth ignore/accept item.
filename - If specified returns [\\$true](#) if the filetype is ignored using the current settings, otherwise [\\$false](#).

Example

```
; Print number of ignore/accept items.  
//echo -ag Number of ignore/accept items is $dccignore(0)  
  
; Print the first ignore/accept item.  
//echo -ag The first ignore/accept item is $dccignore(1)  
  
; Check if 'file.exe' is ignored or not.  
//echo -ag file.exe $iif($dccignore(file.exe), is ignored, is not ignored)
```
