

AdiIRC - \$dll - # 12

Added in 1.9.2

\$dll(N|filename)

Returns the Nth loaded [DLL](#) or the matched [DLL](#) file.

Parameters

N|Filename - The Nth loaded [DLL](#) or the [DLL](#) file to match.

\$dll(filename, procname, data)

Returns the value resulting from a call to a [DLL](#) designed to work with AdiIRC.

Only 64 bit DLL's can be loaded on 64 bit version of AdiIRC, on 32 bit version 32 bit DLL's and even some mIRC DLL's can be loaded.

Parameters

filename - [DLL](#) file to call.

procname - Procname in the [DLL](#) file to call.

data - Data to send.
