

AdiIRC - \$duration - # 6

Added in 1.8.10

\$duration

Returns the duration of the currently playing song in milliseconds.

AdiIRC only.

Only works if Media Player is set to iTunes/MediaMonkey/Winamp and proper plugins are installed.

\$duration(seconds,[N])

Returns the specified number of seconds in a week/day/hour/minute/second format.

See also [\\$ctime](#), [\\$asctime](#), [\\$gmt](#).

Parameters

seconds - Number of seconds or a [\\$duration](#) value to convert back into seconds.

N - If N = 2, the result does not include the seconds value. If N = 3, the result is in hh:nn:ss format.

Example

```
; Print current date using $ctime.  
//echo -ag $duration($ctime)
```

```
; Do a reverse duration.  
//echo -ag $duration(42wks 5days 11hrs 53mins 43secs)
```
