

## AdiIRC - \$exists - # 1

*Added in 1.9.0*

### **\$exists(file|dir)**

Returns [\\$true](#) if a file or dir exists otherwise [\\$false](#).

See also [\\$isfile\\$isdir](#).

### **Parameters**

file|dir - File or directory.

### **Example**

```
; Check if file exists  
if ($exists(c:\windows\notepad.exe) file exists
```

```
; Check if directory exists  
if ($exists(c:\windows) directory exists
```
