

AdiIRC - \$false - # 2

Added in 1.8.10

\$false

Returns \$false, mainly used for [/if](#), [/while](#) expressions.

Example

```
if ($true) {  
    echo -ag expression was true  
}  
  
if (!$true) {  
    echo -ag expression was false  
}  
  
if ($false) {  
    echo -ag expression was false  
}  
  
if (!$false) {  
    echo -ag expression was true  
}
```
