

AdIRC - \$getdir - # 3

Added in 1.9.0

\$getdir

Returns the DCC download directory specified in [Options](#) -> [DCC](#).

\$getdir(filespec)

Returns the DCC download directory matching the filespec, otherwise the directory specified in [Options](#) -> [DCC](#).

Parameters

filespec - The filespec.

Example

```
; Get the directory for .mp3 files.  
//echo -ag $getdir(*.mp3)
```
