

AdiIRC - \$hexcolor - # 1

Added in 3.0

\$hexcolor(color)

Converts a hex color into [\\$rgb](#) decimal format.

Parameters

color - The hex color to convert.

Properties

.rgb - Convert to rrr,ggg,bbb format instead.

Example

```
; Returns "255" decimal.  
//echo -ag $hexcolor(FF0000)
```

```
; Returns "255,0,0" rrr,ggg,bbb value.  
//echo -ag $hexcolor(FF0000).rgb
```
