

## AdiIRC - \$hotlinepos - # 3

*Added in 1.9.0*

### **\$hotlinepos**

Returns the line number and word position triggered during a [on HOTLINK](#) event.

See also [\\$hotline](#), [\\$hotlink](#), [/hotlink](#), [on HOTLINK](#).

### **Example**

```
on *:HOTLINK:*:*:echo -ag Matched line $hotline at $hotlinepos
```
