

AdiIRC - \$ialmark - # 2

Added in 2.8

\$ialmark(nick/mask, [N/name])

Returns the Nth mark for the nick or mask.

See also [/ialmark](#).

Parameters

nick/mask - The nick or mask to return a mark for.

N/name - If N = 0 number of marks, otherwise the Nth mark or the specified mark.

Properties

.name - Returns the mark name.

.mark - Returns the mark text.

Example

```
; Sets a mark for the nick 'nick' with the name 'markname' and the text 'mark text'.  
/ialmark -n nick markname mark text
```

```
; Retrieve the mark text for the name 'markname'.  
//echo -ag $ialmark(nick, markname)
```
