

## AdIRC - \$ibl - # 3

*Added in 1.9.0*

### **\$ibl(#channel,N)**

Returns Nth item in the internal ban list.

Same as [\\$banlist](#).

### **Parameters**

#channel - The channel to retrieve ban list from.

N - If N = 0, total number of bans, otherwise the Nth ban.

### **Properties**

.by - The nick who set the ban.

.ctime - The time the ban was set in unix timestamp format.

.date - The time the ban was set in mmm oo HH:mmtt format.

.secs - Number of seconds until ban expire (if set to expire).

### **Example**

```
; Get number of bans.
```

```
//echo -ag $ibl(#channel, 0)
```

```
; Get information about the first ban.
```

```
//echo -ag $ibl(#channel, 1) set by $ibl(#channel, 1).by set at $ibl(#channel, 1).date
```
