

AdiIRC - \$ifmatch2 - # 2

Added in 1.9.0

\$ifmatch2

Returns the second parameter of an [if-then-else comparison](#).

Same as [\\$v2](#), see also [\\$ifmatch](#).

Example

```
; In this case '$ifmatch' will be 'text' and '$ifmatch2' will be 'sometext'.  
if (text isin sometext) {  
    echo -ag ifmatch2 is $ifmatch2  
}
```
