

AdiIRC - \$iif - # 1

Added in 1.9.0

\$iif(C,T,F)

Returns T or F depending on whether the evaluation of the Conditional C is true or false.

See also [/if](#).

Example

```
; Print 'yes' or 'no' depending if 1 equals 2.  
//echo -ag $iif(1 == 2, yes, no)
```
