

## AdiIRC - \$int - # 1

*Added in 1.9.0*

### **\$int(N)**

Returns the integer part of a floating point number with no rounding.

### **Parameters**

N - The floating point number to convert.

### **Example**

```
; Convert '3.14159' to '3'  
//echo -ag Converted to $int(3.14159)
```
