

AdiIRC - \$isdde - # 2

Added in 1.9.4

\$isdde(name)

Returns [\\$true](#) if the specified [DDE](#) service name is in use, otherwise [\\$false](#).

Parameters

name - The [DDE](#) service name to check.

Example

```
//echo -ag AdiIRC $iif($isdde(Adiirc),is,is not) a DDE service.
```
