

AdiIRC - \$md5 - # 4

Added in 1.9.0

\$md5(text|&binvar|filename,[N])

Returns a md5 hash value for the specified data.

Parameters

text|&binvar|filename - The text or &binvar or filename to calculate.

[N] - The type to calculate N = 0 for plain text (default), 1 for &binvar, 2 for filename (optional)

Example

```
; calculate a md5 hash of the text 'Hello World'  
//echo -ag The MD5 hash for Hello World is $md5>Hello World)
```

```
; calculate a md5 hash of AdiIRC.exe'  
//echo -ag The MD5 hash for AdiIRC.exe is $md5($adiircexe, 2)
```
