

AdiIRC - \$menucontext - # 6

Added in 1.9.1

\$menucontext

Returns the context of a [menu](#) event.

window/hotlink/toolbar/treebar

See also [\\$menutype](#), [\\$menu](#), [\\$mouse](#), [Menus](#).

Example

```
menu @Example {  
  Menu Name:echo -ag Menu name is $menu  
  Menu Type:echo -ag Menu type is $menutype  
  Menu Context:echo -ag Menu context is $menucontext  
}
```
