

AdiIRC - \$menuicon - # 4

Added in 2.7

\$menuicon(filename,[index])

Adds a icon to a [menu item](#).

Since ":" characters are not allowed in the menu text, [\\$chr\(58\)](#) can be used if a X:\ path is used.

Parameters

filename - Path to the icon/image file.

[index] - The Nth icon in a .exe/.dll file. (optional)
