

AdiIRC - \$msgtags - # 4

Added in 1.9.7

\$msgtags

Returns a list of message tags for an incoming server message.

This only applies to [IRCV3](#) messages.

See also [\\$msgstamp](#).

\$msgtags(tag|N)

Returns the individual tags from the \$msgtags identifier.

Parameters

tag|N - The tag to retrieve or the Nth tag, if N = 0, number of tags is returned.

Properties

.tag - Returns the tag name.

.key - Returns the tag value.

Example

```
on *:TEXT:*:#:#:echo -ag Message time tag is $msgtags(time)
```

```
on *:TEXT:*:#:#:echo -ag The 5th tag is $msgtags(5)
```
