

## AdiIRC - \$nopnick - # 2

*Added in 2.0*

### **\$nopnick(#[,N)**

Returns the Nth non operator nick.

### **Parameters**

# - The channel.

N - If N = 0, number of nicks, otherwise the Nth nick.

### **Example**

```
//echo -ag There is $nopnick(#[,0) non operator users
```

```
//echo -ag First non operator nick is $nopnick(#[,1)
```
