

## AdiIRC - \$nvnick - # 3

*Added in 2.0*

### **\$nvnick(#[,N)**

Returns the Nth 'regular' nick. Is a deprecated identifier that's the equivalent of \$nick(#[,N,r)

### **Parameters**

# - The channel.

N - If N = 0, number of nicks, otherwise the Nth nick.

### **Example**

```
//echo -ag There are $nvnick(#[,0) non opvoice users
```

```
//echo -ag First non opvoice nick is $nvnick(#[,1)
```

```
//if ($nvnick(#[,foobar)) echo -ag foobar is the $ord($v1) regular nick
```
