

AdiIRC - \$ocolor - # 5

Added in 2.7

\$ocolor(N)

Returns the Nth color index of the internal color list as a [\\$rgb](#) value.

See also [Config File Colors](#), [/echo](#).

Parameters

N - The Nth color to retrieve.

Properties

.rgb - returns the color in rrr,ggg,bbb format.

.hex - returns the color in hex format.

Example

```
; Get the Editbox color  
//echo -ag Editbox color is $ocolor(30).rgb
```
