

AdiIRC - \$samepath - # 1

Added in 2.6

\$samepath(path1, path2)

Returns [\\$true](#) if path1 is equal to path2, otherwise [\\$false](#).

Resolves relative paths and converts long/short filenames.

Parameters

path1 - First path to compare.

path2 - Second path to compare.

Example

```
//echo -ag $iif($samepath(config.ini, $adiircini), Same path, Different path)
```
