

AdiIRC - \$snick - # 7

Added in 1.9.0

\$snick(#[N])

Returns the Nth selected nickname in the channel listbox on channel #.

Parameters

- The channel.

[N] - If N is not specified, a space separated list of selected nicknames, if N = 0, total number of selected nicks, otherwise the Nth selected nick.

Example

```
; Print a list of selected nicknames  
//echo -ag $snick(#)
```

```
; Print number of selected nicknames  
//echo -ag $snick(#, 0)
```

```
; Print the first selected nickname  
//echo -ag $snick(#, 1)
```
