

AdiIRC - \$style - # 3

Added in 1.8.10

\$style(N)

Used to modify the style of a menuitem during a [menu event](#).

Parameters

N - N = 0 for normal, N = 1 for checked, N = 2 for disabled, and N = 3 for both.

Example

```
; Create a custom window.
/window @Example

; Create a menu for @Example.
menu @Example {
    normal $style(0):
    checked $style(1):
    disabled $style(2):
    checked and disabled $style(3):
}
```
